GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: SCHULZ, GEORG E.
APPLICANT: CANDUSSIO, ANTON
APPLICANT: WICH, GUNTER
TITLE OF INVENTION: CYCLODEXTRIN
FILLE OF INVENTION: CYCLODEXTRIN
FILLE REFERENCE: SCHULZ-W2 CIP
CURRENT APPLICATION NUMBER: US/09/430,702
CURRENT FILING DATE: 1999-10-29
CURRENT APPLICATION NUMBER: 08/816,317

TTER APPLICATION NUMBER: 08/816,317
                                                                                                                                                                                                                                                                                                                                                  RESULT 10
US-09-430-702-1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ঠ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ঠ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 US-08-706-216-6
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   JS-08-706-216-6
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 6, Application US/08706216 Patent No. 6140098
